

## **Total Molding Services, Inc. Embarks on a New Journey as Moldgenix**

**Quakertown, PA (April 8, 2024)** – Total Molding Services, Inc., a contract manufacturer known for plastic injection molding, tooling, and assembly services, is proud to announce its rebranding as a result of new ownership from Haartz Family Holdings, LLC. TMS is now Moldgenix.

A blend of “mold” and “genix” – a reference to Latin roots meaning generation or origin – the name change implies the creation of molded products and is designed to better reflect the company’s innovative spirit and future-forward vision as it undergoes new ownership. Thomas Houdeshell, President of Moldgenix, stated, “We believe Moldgenix aligns perfectly with our continuous drive for excellence and our dedication to spearheading advancements in the industry.”

The transition to Moldgenix is supported by a substantial investment in three primary areas: processes, talent, and technology. The name change reinforces the company’s promise to deliver a “Total Project Solution” for its customers’ manufacturing needs and reflects its proactive approach to adapting and leading in an ever-changing market landscape. The company’s mission continues to focus on offering high-quality products and comprehensive solutions that exceed customer expectations and regulatory standards.

On behalf of everyone at the Haartz, I couldn’t be more excited to announce the launch of Moldgenix,” said company principal Eric Haartz. “We look forward to watching them prosper and thrive in the coming years.”

The Moldgenix brand will be rolled out across all company materials and communication channels, ushering in a dynamic new era for the company and its partners. Stay tuned for more information about Moldgenix and its comprehensive range of services.

###

### **About Moldgenix**

Moldgenix is a scientific injection molder, headquartered in Pennsylvania, that provides tight-tolerance custom plastic parts and solutions for the medical, dental, industrial, electronics, and customer goods industries.

Established in 1987 by Thomas McNutt with deep enthusiasm and engineering expertise, the business was built as Total Molding Services, serving its community, employees, and customers for more than three decades. Moldgenix is driven by a team of logical and tactical deep thinkers who deliver outstanding customer service, high-quality products, cost-effective manufacturing techniques, and value-added solutions. Dedicated problem solvers, their “Total Project Solution” includes in-house services from assisting in material selection to part design, mold design, and mold building. Services also include machining, automation, assembly, packaging, and fulfillment.

Moldgenix adds value and trust by providing innovative solutions. From the initial concept to full production, Moldgenix handles every step of the process with open-mindedness and meticulous care. “*Your vision linked with our solutions becomes your success.*” Visit [www.moldgenix.com](http://www.moldgenix.com) for more information.
